**CSTB special operational  
procedures  
for the issue of certificates  
of conformity of the factory  
production control (system 2+)**

**Flexible sheets for waterproofing  
Bitumen damp proof sheets  
including bitumen basement  
tanking sheets**

## **1 PURPOSE**

These Special Procedures come as a supplement to the CSTB General operational procedures for the issue of CE marking certificates.

CSTB agrees to be entrusted by the Applicant/Holder with a certification mission pertaining to the conformity of the factory production control, including initial verification and surveillance of this factory production control.

These Special Procedures specify the provisions applicable to the issue and the surveillance of certificates of conformity of the factory production control in the particular case of a "Flexible sheets for waterproofing - Bitumen damp proof sheets including bitumen basement tanking sheets" under a system of assessment and verification of performance 2+.

## **2 DOCUMENTS APPLICABLE TO THE APPLICANT/HOLDER**

The present Special Procedures shall be drawn up in accordance with the documents referred to in Appendix 1, that are applicable to the Applicant/Holder.

## **3 APPLICATION**

The application shall be made on the Applicant/Holder's letterhead paper. Each application shall concern one or more specifically designated products, manufactured on a production site specifically designated as well.

The application form template and the list of information to be provided in support of an application are shown in Appendices 2 and 3.

Case of a product covered by a certificate of conformity of the factory production control issued by CSTB, which shall be marketed under a different designation by a distributor:  
The manufacturer shall apply for a new CE certificate for the same product, under a different trade name. The designation of the factory shall be submitted by the certificate holder and validated by CSTB. This procedure shall be conducted by the manufacturer in agreement with the distributor.

The application form template is shown in Appendix 2 bis.

## **4 CSTB'S MISSIONS**

Based on the present Special Procedures, the Applicant/Holder entrusts CSTB with the missions described in Appendix 4.

## **5 CERTIFICATE OF CONFORMITY OF THE FACTORY PRODUCTION CONTROL**

In the particular case of a "Flexible sheets for waterproofing - Bitumen damp proof sheets including bitumen basement tanking sheets", CSTB shall issue a certificate of conformity of the factory production control with an unrestricted period of validity.

**APPENDIX 1 - APPLICABLE DOCUMENTS**

<b>Title</b>	<b>Date</b>	<b>Revision</b>
Harmonised European Standard EN 13969+A1	2006	-

**APPENDIX 2 – APPLICATION FOR A CERTIFICATE OF CONFORMITY OF THE FACTORY PRODUCTION CONTROL Flexible sheets for waterproofing Bitumen damp proof sheets including bitumen basement tanking sheets**

*(Application form to be drawn up for each production site, on the applicant’s headed paper)*

**1 – The Company** *(Specify the corporate name, the legal status, the head office address, the RCS registration number)*

Referred to below as the “Company”

manufacturing ..... *(Specify the type of product(s) and its/their trade name).*

compliant with the harmonized standard EN 13969+A1:2006.

Represented by..... *(Specify the surname and first name of the company’s legal representative),* acting in its capacity as.....

Telephone no.

Email:

Duly authorized to sign the present document,

Hereby apply to CSTB for the issue of a factory production control certificate for this/those product(s), and for the purpose entrust it with the missions described in Appendix 4 of the Special Procedures.

**2 – The Company hereby attests that this/those product(s) is/are manufactured on the following production site:**

*(address of the production site)*

.....  
.....

**3 – The Company declares that it has read and approved the CSTB General operational procedures for the issue of CE marking certificates, as well as the CSTB Special operational procedures for the issue of factory production control certificates for the product Flexible sheets for waterproofing-Bitumen damp proof sheets including bitumen basement tanking sheets, appendices included.**

**4 – The Company undertakes to permanently abide by the provisions contained in the documents mentioned above.**

**5 – The Company authorises CSTB to make available on its Web site the content of the CE marking certificate granted to it, and thus to reproduce the trade name of the company and, if need be, the trade mark of the product covered by the certificate.**

**6 – The Company appoints** *(It may be the legal representative authorized to sign the Special Procedures, or any other person from the Company, responsible for the administrative monitoring of the CE marking application made by the Company. Specify the person’s surname, first name, position, telephone number, fax number and email.)*

Mr. ....

.....  
as its authorized representative in all matters pertaining to the examination of the CE marking certificate application.

**7** – The Company undertakes to pay any further amounts for which it may subsequently be liable in accordance with the CSTB Special Procedures, General Procedures and Fees for issuing CE marking certificates specific to the relevant domain.

Prepared at: .....

Date: .....

Signature: *(Signature with hand-written mention "Read and approved" followed by the surname, first name and signature of the Company's legal representative.)*

**APPENDIX 2 bis – APPLICATION FOR A TRADE MARK EXTENSION OF THE CERTIFICATE OF CONFORMITY OF THE FACTORY PRODUCTION CONTROL**

**Flexible sheets for waterproofing-Bitumen damp proof sheets including bitumen basement tanking sheets**

**MANUFACTURER’S APPLICATION**

*(Application form to be drawn up for each certificate and production concerned, on the manufacturer’s headed paper)*

The Company *(Specify the manufacturer’s corporate name, the legal status, the head office address, the RCS registration number, the telephone number and fax number)*

.....

Represented by .....

Acting in its capacity as .....

Referred to below as the **“Manufacturer”**,

*Attests that it manufactures the following (Products X (Specify the manufacturer’s type of product(s) and the products’ trade name))*.....

.....

*Covered by the CE certificate no.* .....

And requests that the CE marking certificate whose references are mentioned below be used by the following Company *(Specify the distributor’s corporate name, the legal status, the head office address and the RCS registration number)*.....

Represented by....., acting in its capacity as .....

Referred to below as the **“Distributor”**

For the Distributor’s products mentioned in the following table.

The Manufacturer attests that the Distributor’s products mentioned in the table below are identical to the products covered by a certificate of conformity of the factory production control, and that they only differ in their reference and trade mark.

<b>Manufacturer’s products covered by a certificate of conformity of the factory production control</b>		<b>Designation and reference of the Distributor’s products</b>
Certificate No.	Designation and reference of the product	

The Manufacturer undertakes to immediately report to CSTB any changes made to the distribution of those products, and in particular any halt in the Distributor’s supply.

The Manufacturer authorizes CSTB to inform the Distributor of any sanctions taken in accordance with the CSTB General operational procedures for the issue of CE marking certificates, related to the products referred to in this document.

**APPENDIX 3 – LIST OF INFORMATION TO BE PROVIDED**

**1. GENERAL INFORMATION ABOUT THE APPLICANT**

1.1 Production site(s)

- Corporate name: .....
- Address: .....
- Country: .....
- Tel.: (...) .....- Email: .....
- SIRET No.: ..... APE Code: .....
- Name and position of the legal representative.....

1.2 Manufacturer and/or distributor (if different from the production site(s))

- Corporate name: .....
- Address: .....  
.....  
.....
- Country: .....
- Tel.: (...) .....- Email: .....
- SIRET No.: ..... APE Code: .....
- Name and position of the legal representative.....
- Name and position of the contact person (if different): .....

**2. INFORMATION ABOUT THE PRODUCT(S) CONCERNED**

2.1 Designation, intended use(s), essentials characteristics and performances:  
Please attach your project of Declaration of Performances.

Commercial Trade name	Monolayer sheet	Sheets for waterproofing of vertical buried walls	Implementation	
		Monolayer sheet	Welded	Fixed mechanically

*Put a cross in the concerned boxes.*

2.2 Complementary identification of the product(s)

.....  
.....  
.....

2.3 Characteristics

.....  
.....  
.....

**3. TECHNICAL DATA PERTAINING TO THE PRODUCTION PROCESS AND CONTROL PROCEDURES**

- Control plans,
- Technical specifications and compositions,
- ISO 9001 management system certificate if factory is certified,
- Reports of initial tests indicating product references,
- List of references of Bitumen damp proof sheets including bitumen basement tanking sheets,
- Declaration of performance of the product(s) submit to System 2+.

#### **APPENDIX 4 - MISSIONS ENTRUSTED TO CSTB BY THE APPLICANT/HOLDER**

This Appendix sets out the procedures to be followed during inspections performed by CSTB as part of either the examination of an application, or the surveillance relative to the products covered by certificates of conformity of the factory production control.

As a general rule, during any inspection at any location, and whatever the main purpose of its mission, the auditor shall inquire about any questions related to the application of the CSTB General operational procedures and Special operational procedures.

CSTB's missions are as follows:

- Prior to the granting of a certificate of conformity, conduct an initial audit of the production site;
- If needed, following the granting of a certificate of conformity, perform periodic surveillance audits of the production site.

The audit duration is normally 1 day per production unit. This time is flexible depending on the risk: quality system development level, company organization (process, laboratory).

The Periodic audits are conducted at a frequency of 2 audits per year.

When CSTB has sufficient knowledge of the production site relevant to the application:

The Applicant/Holder whose quality management system applicable to its production site is certified in accordance with current Standard EN ISO 9001<sup>1</sup> by a body accredited by a member of the EA (European cooperation for Accreditation) or by an EA-recognized body, will benefit, after a probationary period of 1 year, from a reduced audit frequency or reduced audit agenda provided that the quality management system:

- Applies to the manufacturing of the product(s) concerned;
- Meets the requirements of the relevant harmonized technical specification.

Those last two conditions come within CSTB's recognized competence as a notified body.

The reduction provided for is the following one:

In the case where the manufacturing unit has not been subject to any warnings, warnings or penalties during the last 2 years, supervision may be applied. The frequency of audits is reduced to 1 audit every year. In case of deficiency (s) or anomaly (s) detected during the audit, the alleviation implemented will be eliminated or In the event of loss of the ISO 9001 certificate or the factory is subject "A sanction, the frequency of audits is automatically reassessed to the supervision of two audits per year for a minimum of 1 year. The costs of additional inspection audits or tests shall be borne by the Applicant/Holder.

The verification of corrective measures initiated to address minor non-conformities may be carried out during a surveillance inspection audit (if applicable).

---

<sup>1</sup> The quality management system certification is not required in the context of the CPR.

The following inspection procedures shall be applied:

<b>1) PRODUCTION CONTROL</b>	
Initial audit	Periodic surveillance audit
<u>Geometrical characteristics:</u> Systematic checking of the inspection records for the products concerned. Systematic checking of the use of calibrated equipment. Examination of records of non-conformities and corrective measures.	<u>Geometrical characteristics:</u> Systematic checking of the inspection records for the products concerned.
