Part 1

Obtaining the Certification

Before applying, applicants must ensure they meet the conditions set out in this certification reference system, where their product and sites in question are concerned; it is the applicants' responsibility to make sure their product complies with applicable regulations.

They must undertake to meet the same conditions throughout the entire duration of the use of the QB mark.

If an applicant has subcontracted production:

Applicants may subcontract part of the manufacturing process for the products covered by this Certification Reference System.

If so, they undertake to:

- Be responsible for the effectiveness of the production control system as a whole and compliance with this certification reference system;
- Be able to provide, on the one hand, the specifications that define the inspection operations that they impose on their subcontractor in order to comply with the requirements in this certification reference system and, on the other hand, the evidence regarding the subcontractor's skills in complying with those requirements.

Failure to comply with all of the commitments may lead to a halt to or suspension of the examination of applicants' files.

1.1 Lodging an initial admission application

1.1.1 SUBMISSION OF THE APPLICATION DOSSIER

The application shall be submitted in compliance with the conditions and templates provided in Part 3 (Paragraph 3.1).

If the product comes from a manufacturing plant located outside the European Economic Area, the applicant shall designate a representative within the EEA as a joint signatory to the application.

Before applying, applicants shall make sure that, at the time of the application, they meet the conditions set down in the 'Fibre-Cement Slates' reference system in terms of quality assurance requirements and inspections to perform on products in the production sites in question.

Each application concerns a named product at a production site that is also named.

When the application is received, the following procedure is initiated:

- an administrative and technical review of the request is undertaken;
- the assessment (audits and tests) is carried out;
- the assessment is reviewed;
- the decision is taken.

1.1.2 ADMINISTRATIVE AND TECHNICAL REVIEW OF THE APPLICATION

When the application dossier is received, CSTB verifies that:

- all documents requested in the application dossier are included;
- elements contained in the technical file respect the requirements in the certification reference system.

The request is only admissible if:

- the application letter is complete, signed and accompanied by the signed quote where applicable;
- the applicant manages and assumes responsibility for the following stages: design, production, assembly, quality control, marking, packaging and marketing and specifies the critical points of the various steps;
- any aspect not carried out by the applicant shall be covered by a contract defining the respective responsibilities with the service provider. The applicant shall remain responsible for all the operations and for ensuring they are consistent;
- the products covered by the application comply with the reference standards and technical specifications set out in Part 2 of this certification reference system;
- the inspections and tests for the products covered by the application, specified in this certification reference system, are implemented;
- all requested documents are enclosed with the application, in particular, the contractual documents between the applicant/representative and the applicant/distributor, if applicable.

CSTB also makes sure that it has all the ways and means to reply to the application, and it may be led to request additional information necessary for the admissibility of the dossier if it is incomplete.

Once the application is admissible, CSTB plans for the assessment and informs the applicant of the organisational procedures (auditor, audit duration, sites to be audited, laboratories, products to be sampled, etc.).

1.1.3 ASSESSMENT PROCEDURES

The inspections performed in the context of QB marking are generally of two types:

- audits carried out at the production site;
- tests on the products.

They are supplemented by analysis of inspection records following the audit, an assessment of the capabilities of the holder's technical support, etc.

A report is drafted following these evaluations: audit report, test report, etc.

In case of a deviation, the applicant must:

- 1 - propose an action plan to CSTB within 15 days following notification of the deviation,
- 2 - implement an action plan within:
 - ➔ 3 months in the event of a critical deviation,
 - ➔ 6 to 12 months in the event of a non-critical deviation.

The audit reports may mention weak points. Those points indicate departures from the optimal product/service performance. They do not require any corrective actions. However,

they are analysed within the framework of the next assessment and may be reclassified as deviations in the event of departures leading to non-respect of the reference system requirements.

1.1.4 ASSESSMENT REVIEW AND DECISION

CSTB assesses the test and audit reports that are prepared and sent to the applicant (assessment review).

The reports are accompanied, as the case may be, by deviation sheets, including a request for a corrective action proposal by the applicant within a prescribed time span.

In some cases, a complementary inspection operation may be requested by CSTB once it has analysed the reports.

For each irregularity, the applicant shall describe the actions implemented or planned with the time span for their application consistent with the deviation observed. The persons responsible for the actions to be implemented shall be mentioned too.

CSTB analyses the relevance of the reply and may ask for an additional test to be carried out to check that corrective actions have been set up (partial or complete audit and/or testing/document verification).

CSTB may anonymously submit to the Specific Committee, for approval, a summary of all the assessment results and the proposed decision.

Depending on the results of the entire assessment, CSTB will take one of the following decisions:

- certification agreement with or without comments;
- certification refusal, giving reasons for the refusal.

In case of a positive certification decision, CSTB shall remit the QB certificate to the applicant, which, on that occasion, will become the holder of the right to use the QB mark.

The certificates are issued without a validity date.

The applicant can contest the decision taken by sending a request in conformity with the General Requirements of the QB mark. They are entitled to present their case formally.

Granting the right of use in no way substitutes CSTB's responsibility for the legal responsibility of the company that holds the right to use the QB mark.

The holder can therefore provide information about their certification using the methods defined in Part 2 of the certification reference system.

1.2 Complementary admission application

The steps described in paragraph 1.1 above apply.

The application shall be submitted in compliance with the conditions and templates provided in Part 3 (Paragraph 3.2).

1.3 Extension application

The steps described in paragraph 1.1 above apply.

The application shall be submitted in compliance with the conditions and templates provided in Part 3 (Paragraph 3.3).

1.4 Maintenance application

The application shall be submitted in compliance with the conditions and templates provided in Part 3 (Paragraph 3.4).

For distribution under other trademarks, it is acceptable to make certain presentation modifications to the relevant products that have no functional effect. In this case, the holder shall specify in the maintenance application the list of modifications made to the products in question.

CSTB then makes sure that these modifications have no functional effect.

The Specific Committee is notified when CSTB issues decisions to maintain the right of use.

The company that distributes the certified products must provide CSTB with all the sales documents (catalogues, brochures, websites, etc.) that refer to these products and send updated documents as appropriate.

CSTB may carry out controls at the retail site (merchants, DIY superstores, etc.) for products that are the subject of a maintenance application.

Part 2

Maintaining Certification: Terms and Conditions for Follow-Up

Throughout the certification period, the holder shall:

- comply with the requirements and marking procedures described in Part 2 of the certification reference system;
- update their certification file using the models supplied in Part 3 of this Appendix;
- systematically inform CSTB of any modification to one of the characteristics of the certified product and/or to their organisation that is likely to have an impact on the certification.

In addition, CSTB reserves the right to carry out any controls (visits, tests, verifications, etc.) it deems necessary as a result of:

- a modification affecting the certified product or the quality organisation of the manufacturing entities (manufacturing plant, production workshops, subcontractors' plants, etc.);
- complaints, disputes, legal actions, etc. about which it becomes aware related to use of the QB mark;
- checks (including sampling) may be made in trade outlets.

In case of disputes with users, the verifications may include sample-taking or testing on the utilisation premises (in that case, the holder is invited to be represented so as to witness the operations).

2.1 Conditions for follow-up inspection

The monitoring of the certified products includes follow-up audits of the production unit and tests on the products.

It also involves surveillance of the usage of the mark and the logos on the products, packaging and any communication materials.

The reports are accompanied by deviation sheets if necessary, including a request for a proposed corrective action by the holder within a prescribed time span. Deviations are processed in accordance with the provisions defined in §1.1.3.

The follow-up conditions depend upon the following:

- whether or not the holder holds the ISO 9001 certification, in compliance with Part 2 of this certification reference system;
- decisions made following previous controls (audits and tests);
- any applicable reductions.

Before initiating the follow-up process, CSTB completes an administrative and technical review of the certification dossier to make sure no modifications affecting certification need to be taken into account.

2.2 Assessment review and decision

CSTB assesses the test and audit reports that are prepared and sent to the holder (assessment review).

In some cases, a complementary inspection operation may be requested by CSTB once it has analysed the reports.

For each deviation, the holder shall present the actions implemented or envisaged with a relevant time span for bringing them into application with regard to the deviation observed. The persons responsible for the actions to be implemented shall be mentioned too.

CSTB analyses the pertinence of the reply and can request the implementation of a complementary check.

CSTB may anonymously submit to the Specific Committee, for approval, a summary of all the assessment results and proposals.

Depending on the results of all the checks, CSTB comes to a conclusion about the assessment and notifies the holder of the conclusion, which may be:

- a decision to maintain the certificate;
- a decision to sanction in accordance with the General Requirements of the QB mark.

In the event of a sanction, this will be operative dating from its notification. The choice of sanction depends on the severity of the observed deviation. The sanction notifications that affect the usage right are signed by CSTB Management.

The cost of additional verifications due to the sanctions or after analysis of reports is to be borne by the holder.

The holders and their distributors that benefit from maintenance of the right of use are each responsible for the right to use the QB mark in relation to the product under consideration and undertake to apply the measures resulting from the penalties, decided upon in conformity with the certification reference system.

QB Certification Administrative Management Appendix
Fibre-Cement Slates
Revision No.: 05

Any suspension or withdrawal of the right to use the QB mark results in the prohibition to use the QB mark or to make reference to it. This obligation is valid not only for the holder but also for the whole sales network of their company, as well as for the dealers called upon to distribute the company's products.

All the documentation (technical and sales documents, labels, notices, advertising, websites, etc.) shall no longer mention the QB mark for the product subjected to a suspension or a withdrawal (erratum and/or reprinting).

Holders can contest the decision taken by submitting a request in conformity with the General Requirements of the QB mark. They are entitled to present their case formally.

Part 3

Certification Files

The application for the right to use the mark must be drawn up by the applicant/holder in one copy in accordance with the examples and templates set out below. **One original of this request shall be made on the applicant's letterhead paper in French** and the entire application shall be sent to CSTB.

In the event that the product comes from a manufacturing unit located outside the European Economic Area, the applicant designates a representative within the European Economic Area who co-signs the application.

An application concerning a product which benefits from a foreign conformity mark or from a test certificate issued by a foreign laboratory is processed, taking into account any existing recognition agreements, in conformity with the General Requirements of the QB mark.

Note: Electronic versions of template letters and sheets may be obtained from CSTB.

3.1 Case of an initial admission application

Applicants prepare a dossier to include:

- an application and commitment letter from the applicant in accordance with standard letter 1;
- a general information sheet about the applicant, as per standard sheet 3;
- a data sheet per product according to standard sheet 4.

3.2 Case of a complementary admission application

Holders prepare a dossier to include:

- an application and commitment letter in accordance with standard letter 1;
- a general information sheet about the applicant, as per standard sheet 3;
- a data sheet per product according to standard sheet 4.

3.3 Case of an extension application

Holders prepare a dossier to include:

- an application and commitment letter from the holder in accordance with standard letter 2A;
- a data sheet per product according to standard sheet 4.

3.4 Case of a maintenance application

Holders prepare a dossier to include:

- an application and commitment letter from the holder in accordance with standard letter 2B;
- a distributor's commitment sheet (signed) on their Company's letterhead paper, in accordance with standard letter 2B (cont'd).

3.5 Case of a new admission application following withdrawal of the right to use the QB mark

Holders prepare a dossier to include:

- an application and commitment letter from the applicant in accordance with standard letter 1;
- a general information sheet about the applicant, as per standard sheet 3;
- a data sheet per product as per standard sheet 4;
- specific items that all applicants must submit as part of a new admission application where the right of use has been withdrawn as a result of a sanction, using standard sheet 5.

Part 4

Prices

The purpose of this part is to define the total cost due for QB certification-related services and to describe the terms of payment.

QB certification includes the following services:

- Management (development and implementation of an application, examination of the certification application, processing of certification application);
- Right to use the QB mark;
- Testing;
- Sampling;
- Audits;
- Complementary or supplementary checks;
- Travel expenses.

Travel expenses		<p>If they are not included in the 'audit' service, the travel expenses are to be invoiced after the performance of each audit.</p>

4.2 Paying for the services

4.2.1 INITIAL APPLICATION/EXTENSION APPLICATION

Together with its certification application (initial or extension application), the Applicant makes an advance payment equivalent to 50% of the fees relative to the services of managing, testing, sampling and auditing.

These services are invoiced at the Admission stage (granting of right of use). It is a single flat amount.

If they are not included in the 'audit' service, the travel expenses are to be invoiced after the performance of each audit.

These fees remain payable even if the right to use the QB mark is not awarded or extended or if the application is abandoned during the examination.

Whenever the QB mark is granted during the year, the amount of the usage fee is calculated on a pro rata basis, based on the number of months following the decision to grant the right of use.

4.2.2 MONITORING

The fees for the annual services pertaining to management, auditing, testing, sampling and the right to use the QB mark will be invoiced during the first quarter of each year and remain payable if the right to use the QB mark is not renewed, is cancelled or is suspended during the year.

If they are not included in the 'audit' service, the travel expenses are to be invoiced after the performance of each audit.

4.2.3 NON-PAYMENT OF AMOUNTS DUE

The applicant or holder of the right to use the QB mark must pay all their fees in accordance with the stipulated terms of payment. Any failure on their part constitutes an obstacle to the performance by CSTB of the responsibilities of verification and corrective action that are incumbent upon it under this certification reference system.

In case an initial notification by registered letter, with receipt acknowledgement, should not result, within one month, in the payment of all the sums due, all penalties provided for in the General Requirements of the QB mark may be applied for all the products accepted for that holder.

4.3 Cancellation by the applicant/holder of an audit or a test

As regards any audit cancelled by the applicant/holder less than 30 days prior to the date of the audit, CSTB may charge a lump sum by way of damages:

- 25% of the audit invoice if cancelled 1 month prior to the audit;
- 50% of the audit invoice if cancelled from 1 month to 15 days prior to the audit;
- 75% of the audit invoice if cancelled less than 15 days prior to the audit.

If the CSTB travel and accommodation expenses are not subject to a fixed rate, they will also be invoiced if those expenses cannot be fully refunded.

Applicants/holders do not have to pay this lump sum provided that they can demonstrate that the cancellation directly results from a case of *force majeure* as specified under French Law.

4.4 Prices

Prices are reviewed annually, in the form of a price list drawn up by CSTB. This revision is decided on after consultation with the Specific Committee.

If holders refuse to recognise the annual price review, they will be deemed to have voluntarily terminated the certification contract and the right to use the QB mark for their certified products.
