

Certification in a nutshell

Pre-insulated piping

The product is certified by a certification body accredited according to ISO CEI 17 065 by a body recognized by E.A. (European cooperation for Accreditation).

The certified characteristics are the following:

- According to Product Standards NF EN 253+A2, NF EN 488, NF EN 448, NF EN 489 :
Specifications pertaining to service pipes, fittings and valves
Specifications pertaining to protection sleeves
Specifications pertaining to the insulating material
Specifications pertaining to pipes, fittings and preinsulated valves
Specifications pertaining to the assembly system
- According to complementary specifications:
Training installers
Technical Assistance

The certification reference system is being developed by gathering the views of the different stakeholders:

- professionals producing the product and/or providing the service,
- consumers, users, specifiers,
- administrations, technical experts.

The certification reference system and the valid certificates (or the list of the certified products) are available to the public, free of charge and without any identification information requirement, via a website or any other means.

Whenever technically possible, the certified products are specifically marked, at least with reference to the mark.

The certified characteristics are assessed under the responsibility of the certification body, on the basis of the following checks:

	Admission	Continuous surveillance
Performance an audit of the production by a qualified technical auditor: - Supervision of controls and records of the production: raw materials, processes, end products - Supervision of the quality management provisions: metrology, packaging, storage, traceability, marking of the product, handling nonconformities and customer complaints - Supervision of tests on certified characteristics, if applicable.	Yes	Yes Frequency: 1 audit every 12 months
Performance of an audit of a building site by a qualified technical auditor: - If a deviation is notified within the framework of the production audit: - a building site audit shall be scheduled to verify the training and skills of installers.	Yes	Yes Frequency: 1 audit every 12 months

This data sheet is a synthesis and aims at a quick understanding by any specifier of the scope and assessment rules for the certification.
